/note="Vector: pHOS2; Site_1: BstXI; Total genomic DNA was isolated from early log phase trophozoites of E. invadens IP-1 using a Qiagen plant DNA extraction kit. A shotgun medium-size plasmid library (average insert size of 10 lib. kb) was generated by random mechanical shearing of E. invadens genomic DNA, repairing the ends of DNA fragments with T4 Polymerase, adding BstXI adaptors and ligating into the BstXI site of a pUC-derived vector pHOS2."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ö

act least 4 generations. Samples collected; the semples coorges; in vitro derived embryos [2-e1], morital blastcoyst and nuclear transfer blastcoyst; in vivo blastcoysts and nuclear transfer blastcoysts.

Pagacents and nuclear transfer blastcoyst; in vivo and blastcoysts and placents demonstrated and retain all selewhere (Soarse et al., 1944, found at the following URL:

Library construction (Standard Protocoll: All procedures have been described in detail elsewhere (Soarse et al., 1945, found oct al., 1955, Jiang et al., 2001). Total callular RNA from each sample was isolated by using STAT-60 reagent (Tel.Test, Peristal Soarse) by using STAT-60 reagent (Tel.Test, Peristal Soarse) by two runds of purification with the Oilgotox mRNA isolation kt (Glagen) according to constructed by E. Ferguson and R. Woods essentially as described by the manificaturer's instructions provided with the Supersfortipe Plasmid System (Invitrogen). Act. no. 1824-013. Entitle Manifer State of a prival and reverse transcriped at Gla and protocol. Therefore, and reverse transcriped with Supersforing in (Invitrogen) reverse transcriped with Supersforing in (Invitrogen) reverse transcriped with a Nort-tag-dris oilgonucleotide sudd of selected with Nort. The Diagonal College and digeted with Nort. The China college state of a product of the Reverse of a practicular and protocol. Therefore, prevened transcriped with a Nort-tag-dris oligonal colled with a Nort-tag-dris

the libraries, equal numbers of recombinants from each library were pooled to produce a single mixed library (mega-library) for more extensive sequencing.
Bioinformatics work was performed by GK Springer's bioinformatics work was performed by GK Springer's bioinformatics group (Spollen WG, Topinka CM, Khambati AA) in Computer Science at the University of Missouri-Columbia. RESULT 12

```
STAT-60 reagent (Tel-Test, Friendswood, TX) and the poly(A) + RNA was obtained by two rounds of purification with the Oligotex mRNA isolation kit (Qiagen) according to the manufacturer's instructions. The libraries were constructed essentially as described by the manufacturer's instructions provided with the SuperScript Plasmid System
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       (Invitrogen, cat. no. 18248-013). Briefly, imcg of poly(A)+ RNA was annealed at c37 degrees with 10mcg of NotI-tag-dT18 oligonucleotide (GCTGCTCGCGGCCGC-tag-T18) and reverse transcribed at c37 degrees with SuperScript II (Invitrogen) reverse transcriptase (Jiang et al., 2001). The 'tag' represents a tissue/stage-specific ten-base sequence identifier
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           (http://genome.uiowa.edu/pubsoft/software.html) present in

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  TITLE
```

Second strand synthesis was performed with T4 DNA by polymerase in the presence of DNA ligase and RNase H. After second strand synthesis the double-etranded cDNAs were ligated to Sall adapters (Invitrogan-Life rechnologies) and digasted with Not1. The CDNAs were size selected by passage through count of a fart clination in the CDNAs were size extended columns (Invitrogan-Life rechnologies). The CDNAs derived from each developmental stage of a particular tissue were mixed on an equinolar basis and ligated directionally incompared in the Not1 and Sall sizes of the pow Sperke vector. (Invitrogan) After ligation of the inserts, the plasmids verse alectropared with inco DHO Bacterial Library Construction (PCR Protocol): The amount of maNA that was construction (PCR Protocol): The amount of maNA that was construction (PCR Protocol): The amount of maNA that was utilized for producing libraries from sources in which the amount of extracted maNA was small (coortees and embryos). Poly-A RNA was isolated by using the Microboly(A) Pure kit from Ambion (cat. # 1918). The manil was not complementary to the SNAT oligonuclectide. Sequences within the SNAT oligonuclectide sequences within the SNAT oligonuclectide sequences within the SNAT oligonuclectide. Sequences within the SNAT oligonuclectide sequences from complements of stagested with Not and Sall assist perposenting the predominal columns of stagested with Not and Sall assisted to conting libra
